Who is Jane Doe?

Aquinas students perform the fifth annual Jane Doe Project this Thursday

By Stephanie Glick

The Jane Doe Project will take place Thursday, April 11, in the Mage-Ruffled. The project, an annually recurring event, was created in 2009 by Cheryl Runco and an Aquinas alum. The purpose of the event is to bring awareness about violence against women. Runco and Runco’s wife, Kansas woman, student, faculty, and alumna Ali, who had been abused psychologically and mentally by Runco, decided to find an event that helps victims of abuse. Runcou and Runco’s goal was to create an event that not only raises awareness but also educates and supports those who have been through similar experiences.

On April 11, students will participate in the project. The event will be from 6 p.m. to 9 p.m. in the Mage-Ruffled. The event will include a performance, a panel discussion, and a screening of the documentary “Jane Doe: A Voice for Women.” The performance will be a one-act play performed by the Aquinas College Theatre Company. The play is based on true stories of women who have been abuse victims.

The panel discussion will be led by Dr. Jennifer Gipe, professor of psychology, and will focus on the issue of domestic violence. The panelists will be professionals in the field of psychology and sociology, including Dr. Jennifer Gipe, professor of psychology, and Dr. Susan Driscoll, associate professor of psychology. The panelists will discuss the impact of domestic violence on the individual and society.

The screening of the documentary “Jane Doe: A Voice for Women” will provide a visual representation of the issue. The documentary features stories of domestic violence victims and highlights the importance of raising awareness.

Standing together, the Jane Doe cast from 2011 performs the final monologue together. Jane Doe aims to educate students about the issue of domestic violence and to encourage them to take action to help prevent such violence.

Marriage debate

Supreme Court takes up Proposal 8

By Mayra Minney

The Supreme Court has taken up a new controversial case. The justices are deliberating on Proposal 8, a policy existing in California that denies benefits to same-sex couples. The policy was approved by the state of California in 2008, despite the ruling of the California Supreme Court stating that same-sex couples had a constitutional right to marry.

The Supreme Court picked up the case, along with the Defense of Marriage Act, which is a law that denies benefits to same-sex couples. Both of these cases were argued simultaneously, but the Supreme Court deliberated in court.

The Supreme Court has not yet decided on the matter. However, some members of the court are expected to vote in favor of Proposal 8, while others are expected to vote against it.

Summer research at Aquinas

Mohler-Thompson grants allow three AQ students to pursue studies

By Carly Plank

Each summer, a handful of ambitious students remain close to campus in order to collaborate with faculty mentors on intensive research projects and immerse themselves in a specific area of study. This year, Kendra Garcia, Jacquelyn Gipe, and Andrew Zahrt will take on projects in biology, mathematics, and chemistry, respectively. All these projects are recipients of Mollier-Thompson grants, which allow students to focus on research.

Kendra Garcia, a junior biology major, will work with Dr. Bob Penz, associate professor of biology, on an ongoing project that involves the bacterium that causes kidney infections. Garcia will investigate the role of specific amino acids in the bacterium’s ability to cause infection. The project is important because it helps Garcia understand the importance of amino acids and how they influence the pathogenicity of the bacterium.

Jacquelyn Gipe, a sophomore biology major, will work with Dr. Barry Gibb, associate professor of biology, on an ongoing project that involves the bacterium that causes kidney infections. Gipe will investigate the role of specific amino acids in the bacterium’s ability to cause infection. The project is important because it helps Gipe understand the importance of amino acids and how they influence the pathogenicity of the bacterium.

Andrew Zahrt, a junior chemistry major, will work with Dr. Ben Gipe, associate professor of chemistry, on a project that involves the bacterium that causes kidney infections. Zahrt will investigate the role of specific amino acids in the bacterium’s ability to cause infection. The project is important because it helps Zahrt understand the importance of amino acids and how they influence the pathogenicity of the bacterium.

The project is similar to one that earned a 2010 Nobel Prize in Chemistry. “It is possible to make amino acids that cannot be synthesized in the laboratory,” said Zahrt. “We are working on creating these amino acids to help researchers understand how they influence the pathogenicity of the bacterium.”

Standing together, the Jane Doe cast from 2011 performs the final monologue together. Jane Doe aims to educate students about the issue of domestic violence and to encourage them to take action to help prevent such violence.

Hot topic

There has been a significant amount of public reaction to Proposal 8, both on the state and national levels.

On the opposing side, the conservative justices Chief Justice John Roberts, Antonin Scalia, Samuel Alito, and Clarence Thomas all believe that the proposition should stay in place. The final vote is expected to be a 5-4 decision, with Justice Anthony Kennedy, an independent-minded justice, voting with the conservative justices. However, some members of the Supreme Court have indicated that they may vote against Proposal 8.

The general public has also taken a stance in the issue. Protestors and protesters are planning to take to the streets to express their views.

With heated debate on both sides of the issue, the decision is sure to be a controversial one. The estimated date of the decision is to be in early October.

The Supreme Court has not yet decided on the matter. However, some members of the court are expected to vote in favor of Proposal 8, while others are expected to vote against it.

A trip to Africa

The Saint Reporter

Dear Students,

I am writing to share the excitement of the AQ Women's Chorale's trip to Africa. We are looking forward to the opportunity to explore and experience different cultures, learn about the history and traditions of Africa, and share our own stories and perspectives with our hosts.

We will be visiting several countries, including Tanzania, Namibia, and Malawi. The trip will include visits to local communities, schools, and orphanages to share our culture and learn from theirs. We will also have the opportunity to perform and participate in cultural activities.

We are grateful for the support of our families, friends, and the AQ community. Together, we will make meaningful connections and create lasting memories on this memorable trip.

Sincerely,

Prof. Laura Farrell
News Editor

A trip around the world: The AQ Women's Chorale is traveling to Africa and will be performing at the Aurora Performing Arts Center on April 17. This trip is an opportunity for the choir to connect with different cultures and learn about the unique traditions of Africa.

All proceeds from the event will be donated to local charities that support education and social justice. The choir is excited to share their music and raise awareness about the importance of cultural exchange.

Please join us for this special evening at the Aurora Performing Arts Center. Tickets are available at the door for $25 per person.

Sincerely,

Prof. Laura Farrell
News Editor

Professor Spotlight Dr. Anthony Burdick

Dr. Anthony Burdick, professor of Accounting, is a native of Northampton, Massachusetts. He received his undergraduate degree from Pontiac Central High School and the Master of Science of Accounting from the University of Missouri in 2008.

Dr. Burdick teaches Accounting at Aquinas College. In 2010, he founded The Meal of Shared Responsibility, a program that encourages customers to pay what they can afford for their meals at Panera Bread, with the proceeds going to local charities.

Dr. Burdick's research interests include corporate social responsibility and the role of businesses in addressing social issues. He has published several articles on these topics and has presented at conferences around the world.

In his free time, Dr. Burdick enjoys playing the saxophone and spending time with his family. He and his wife, Dr. Jennifer Burdick, have two children, ages 6 and 8.

Dr. Burdick is passionate about teaching and encouraging students to be active in their community. He believes that education has the power to create positive change and that every individual can make a difference.

HONORED FOR SERVICE

By Hilary Major

The Saint Reporter

Aquinas College has received the designation of the President’s Higher Education Community Service Honor Roll that is handed out annually honoring higher institutions involved in service to the community. This award was established in 2006, and the website describes it as follows: “This award annually highlights the role of colleges and universities in solving community problems by recognizing institutions that achieve meaningful, measurable outcomes in the communities they serve.”

Spring is a part of the college’s four Dominican charisms. Dr. Kathy Kremer found that it is crucial to collect data and apply for this type of award for Aquinas to be recognized for all the service the students put in hours. The data was collected from July 1st to June 30th.

"We have known for a long time that we are an engaged campus," said Dr. Kremer, "but now we have tangible recognition of our community participation." After much researching, collecting data, and talking to other professors and faculty members, Dr. Kremer found that 1,890 Aquinas students have participated in service projects. Over 31,000 of those volunteer hours were dedicated to service connected to coursework and about 10,000 of the hours were connected to service trips and other non-course-related projects. Many of those non-course-related service projects include Project Green from the Nature Center, service-learning trips from the fall, spring, and summer and Footsteps First Classroom. The week-volunteer activities tie into the role that Aquinas has always prided itself on, which is being a part of the community is endless, and many of the students find that the opportunities occur across the United States and even internationally through the Dominican Republic and India.

"In the past we have designated community engagement as a part of the culture here at Aquinas College, but this year we are dedicating ourselves, both through partnerships and through our institution, to really also help us all students that want to be an engaged campus," said Dr. Kremer, "so we can really impact our ability to increase donor support." In the future, the college would like to look at what the most impact the service work done through the college actually results in. Through this, Aquinas College looks to receive this designation annually.

World News Update

North Korea continues to threaten with nuclear weapons

By Chuck Hyde

The Saint Reporter

NORTH KOREA-The massive missile that was fired at the international spotlight. The country's president, Kim Jong Un, does not shy away from the opportunity to make noise and seemingly have nuclear weapons.

CNN reports that on Friday, Pyongyang announced it would fire missiles. It is not known whether the missiles will hit their target or not, but the announcement is a sign of the potential nuclear war. The announcement comes on the heels of the United States ending a high-level visit to North Korea. The U.S. government was not given a reason for the visit, but it is likely to be a result of the Korean conflict.

CENTRAL AFRICAN REPUBLIC: Thousands of people have fled their homes in the country since December, the BBC reports. The evacuation is due to a rebellion that is rocking the country. The country's president, Michel Djotodia, is following the captain of the Air Force South. South Africans were recently stationed in the country, but have withdrawn due to the danger they are facing. Over 175,000 people have been displaced since the beginning of the conflict.

INDIA: Friday saw the collapse of a residential building in Mumbai, reports Reuters. The building's collapse is a sign of the dangerous practice of cutting corners that are becoming common in India. The causes of its collapse are still being investigated.

NYTIMES President Barack Obama is expected to announce on Friday that he will select the first female Secret Service Director. According to reports, the Secret Service Director will be selected from a list of many Americans and will be chosen to keep up the high expectations set by its past. President Obama has a list of criteria that the job should be picked from, and he hopes to see success in something that has been confused in the past. He wants to see a woman in this role.

FBI agents have been ordered to put an end to counterterrorism, and the Secret Service has provided full-time protection for the president. Secret Service agents have been watching over the president’s every move. While the president has been in office, the Secret Service has been investigating his cases. Unfortunately, the case, which still remains in the court, is much closer to the court than to the case.

The president’s Secret Service agents also take on other roles, such as protecting the vice president, former presidents, presidential nominees, and making visits to foreign leaders. It was not until 1970 that the first woman was sworn into the Secret Service. In 1979, two women were sworn in and then some time later women were allowed to become Secret Service agents.

Reoccurring nightmare

Amanda Knox heads back to trial in Italy for murder charge

By Laura Farrell

News Editor

Amanda Knox heads back to trial in Italy for murder charge. Knox and her former boyfriend were arrested in 2007 for the murder of Meredith Kercher, while studying abroad in Perugia. The trial began in 2008 and lasted for nearly 2 years, with Knox and her boyfriend eventually being acquitted of all charges. The judge ruled that there was not enough evidence to convict both Knox and her boyfriend. With little DNA evidence that was also considered to be faulty, the trial was overturned and will hold a new trial for her murder charge.

A worldwide case, different media outlets, and many nations have been involved in this case. Knox and her boyfriend were allowed to be involved in the trial, but the trial is potentially international. The case has no start date, will most likely not be heard for another two years, but the trial is ongoing.

The Amanda Knox case is still ongoing. Knox and her boyfriend were arrested in 2007 for the murder of Meredith Kercher, while studying abroad in Perugia. G.I. Joe Retaliation sacrifices quality for special effects

with a plethora of action-packed, high-octane scenes that include on-screen theatrics and a plethora of energy. The film is not short on action, with plenty of gunfights, car chases, and explosions. The action is generally well-executed, with some of the most exciting sequences involving the fighting against Cobra. However, the film also contains some scenes that are somewhat predictable and lack originality.

The story follows two G.I. Joes, two young, diverse soldiers who must face the challenges of war and survival. The film explores themes of sacrifice, loyalty, and the complexities of war. The acting is generally good, with the actors delivering strong performances. The dialogue is well-written, with some memorable lines and moments of humor.

Overall, G.I. Joe Retaliation is a fun and action-packed film that will entertain fans of the franchise and action movies in general. While the film has some flaws and may not be considered a masterpiece, it is a worthy addition to the G.I. Joe series and a fun film for fans to enjoy.
I Am Not A Human Being II
More like I'm not interested

Dakakom asks you to embrace your awkwardness

By Brian Kalchik
The Saint Reporter

Wang, you can never see Li Tusheng, at both a new yet again with his bat. He was still there. The left-handed Haddad, as the most obvious and you can only see the most important. While some of the tracks such as "My Heroes Still," "No Worries," and "Love Me" have already been made popular singles, the rest of the album is not that different from the previous Wang's style.

The audience applauded as he took the stage, as King still on top of his game. Even his voice was identical to the old legend played with vigor, his energy was in no short supply as the guitars weeping, wailing, and roaring as "Voodoo Child (a tribute to King)" was performed. As with most of Wayne's albums, the tracks were self-centered, but in some ways. Maybe this is due to Wayne's repetitiveness and extravagance which people may view as over-the-top, to say the least. Drugs and sex are, of course, prevalent on this album.

Considering Wayne's previous work and the information, it is obvious that there have surrounded him over the past couple months in volving Wayne's health, his music on the album, is disagreeable. However, his voice was clear, and the way he was singing was heartfelt.
Detroit Red Wings
Fighting to the finish

By Hillary Major
The Saint Reporter

The Red Wings are holding on, but barely, to their playoff spot as they remain in seventh place in the Western Conference at the moment and are 4-6-0 in their last 10 games. On March 21, the Wings started a four-game Western road trip that had been delayed last month due to a fuel pump problem with Busch's car. Although the Wings looked like they might pull the in-car extinguisher and was able to put out the flames almost immediately. A fuel pump problem caused Busch's car to overheat, and the Wings traveled west to face the San Jose Sharks.

The Wings total win-loss record is 19-14-5. They are nearing the end of the season, but there is always hope for another shot at the playoffs. The Wings have nothing to lose and everything to gain in their final four games.

With only four remaining regular season matches left, the Aquinas women’s tennis team shows no signs of slowing down. Heading into the final stretch, the Hawks are doing what they do best—winning.

With three freshmen on the team, the Hawks have a multitude of new and returning players which has only increased their ability to win. “It has been really great and supportive,” said freshman Andrea Bandy.

As the season winds down, the Hawks are looking strong, not losing a game since March 15. The Saints will play all of their last two four games this coming weekend: April 13 and 15, with a home-court advantage.

Sutton’s original tennis team was having a challenging season, through, holding an over record of 1-9 and a W-AAC record of 1-6. Only 12 regular season games left to play, the Saints have built up and down all season.

“We were doing really well until a lot of our team members became injured, because of our inaugural players, we are still learning and trying to get the feel for things again,” said Sutton.

The Hawks are not conversing with much success in the W-AAC, but they are determined to overcome their season as strong as possible.

“We are really impressed by this year. We have had some good wins this season including wins over nationally ranked teams. Now, we are preparing for our upcoming matches,” said assistant coach Jordan O’Neill.

The Saints will play next at home against Northwest Ohio on Saturday, April 13. With previous injuries, the Hawks are planning to play, again, the likelihood of victory for the Hawks is determined that now to finish the season strong.

Detroit Tigers
Baseball
Anything is possible

by Brian Kalchik

Coming off a strong campaign last year which saw the Tigers sweep the powerful New York Yankees and ultimately lose in the American Giants in the World Series, there are many areas that need improvement for the Tigers to make the next step up to championship.

The Tigers acquired Tori Hunter from the Angels in the offseason and brought back Victor Martinez from signing a one-year deal. Martinez had been out for the season and are rounding out the starting five.

The Tigers will line some key players back into the fold. Yoenis Cespedes, who broke out last year, has been struggling to find his stride. However, he did hit a home run during last year’s post-season, last year, was let go by the Athletics and signed with the Orioles, led by the Triple Crown winner and Rookie of the Year, Miguel Cabrera. Prince Fielder also provides a solid one-two punch with Cabrera, both of which are out in the starting five.

The Tigers only have 115 games remaining this season. Yoenis Cespedes, who broke out last year, has been struggling to find his stride. However, he did hit a home run during last year’s post-season. Miguel Cabrera, Yoenis Cespedes and Prince Fielder provide a solid one-two punch in the starting five.
